

Datasheet

FREEDOM ARM

6-axis portable CMM for touch probes

6-axis portable arm includes:

- mounting ring with base plate
- protective dust cover
- transit storage case
- calibration bar (SELECT models only)
- ISO 10360-12 calibration certificate
- 15 months warranty
- USB interface for tactile probes
- wireless interface for tactile probes
- rechargeable battery
- accessory kit includes:
 - Ø3, 5, 15mm tactile probes
 - calibration sphere
- accessory case

Model shown:
FREEDOM select

TECHNICAL DATA | Portable Arm

mm (inch) kg [lbs]

TECHNICAL DATA | System Requirements

FREEDOM ARM 6-axis

ENVIRONMENTAL REQUIREMENTS

Operating temperature	+5°C to +40°C
Storage temperature	-30°C to +70°C
Operating elevation	2000m
Relative humidity	10% to 90% non-condensing

SUPPLY REQUIREMENTS

Power supply	110-240V single phase
--------------	-----------------------

CONFORMITY

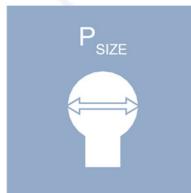

Portable arm	Probing accuracy certified according to ISO 10360-12 CE – FCC - IC
--------------	---

TECHNICAL DATA | Accuracy Verification

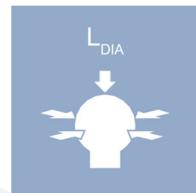

FREEDOM arms are delivered fully traceable to internationally recognised accuracy certification ISO 10360-12 for the probing accuracy of portable measuring arms, giving users complete confidence in the reliability of their measurements.

The E UNI value is the maximum permissible error for unidirectional length measurements. It therefore most closely reflects most measurement needs.

The P SIZE value is the maximum permissible error for measuring the diameter of a sphere. It therefore signifies the accuracy of feature measurements.

The L DIA value is the maximum permissible error for the articulation location. It therefore represents the repeatability of the arm.

The P FORM value is the maximum permissible error for the form of a sphere. This is a value that defines the dispersion accuracy of the arm.

¹ Touch probe accuracy specification.

E UNI Maximum permissible longitudinal error of measurement – according to ISO 10360-12:2016

P SIZE Maximum permissible probe deviation, size – according to ISO 10360-12:2016

L DIA Maximum permissible probe deviation, position – according to ISO 10360-12:2016

P FORM Maximum permissible probe deviation, shape – according to ISO 10360-12:2016

² Arm weight without laser scanner attached.
